

## **Find You Near**

There's no easy road  
There's no happy ever after  
Life's not just a fairytale  
Ship's going down  
And we're standing deep in water  
All you can do is start to bail

I may have Snow White's mirror  
But I don't recognize  
The face that's staring back at me  
I know those blue eyes  
But the rest seems so hollow  
Can an illusion set me free?

After the war  
After the battles  
Waiting till the smoke has cleared  
When all is said and done  
And when the dust has settled  
I'm relieved to find you near

I saw the cut so deep  
But I could not turn away  
From your wounds and broken glass  
Don't want to be empty  
Don't want to lose it all  
We've got to stop the bleeding fast

It's like a heavy cloud  
That has set up camp  
Right over our heads  
When the sky splits open  
You await the pain  
But it feels good instead
